

I am absolutely against corporate big business monopolizing our airwaves to any more extent than already exists. It is bad enough as it is. If it becomes any more controlled, it will drastically effect our culture for the worse. The people will come together and fight for our rights to free media coverage, and to knowing the truth. Consolidation of media is wrong, and against our constitution. I oppose it with all of my heart, and will do anything and everything I am able to prevent this from happening. Please honor the people's right to choose and to vote. Thank you for putting a stop to this mind-controlling madness.
